

The RamperPro can now work together with the Kessler Second Shooter controller

Submitted by andre on Thu, 10/15/2015 - 18:04

The RamperPro can now be connected to the Kessler Second Shooter controller via USB. That means that these two devices can now perfectly synchronize with each other. The RamperPro will control the camera. The Second Shooter controller will control your move. Here is how to set this all up:
