Minor RamperPro update released. Version 3072

Submitted by andre on Mon, 03/05/2018 - 19:59

We have just released firmware 3072 for all RamperPro models. This firmware contains no new features, but it includes support for a few new camera models:

Change log

- The new Sony Alpha α7r III is now supported by the RamperPro! This is the first Sony alpha camera that can store the images on the internal memory card of the camera. That was not the case with previous Alpha camera's where the RamperPro had to download the RAW files to the RamperPros' memory card
- Support for the Canon 6D Mark II
